KIVU

WE FIGHT **CYBERCRIME**. WE PROTECT **HUMANITY**.

KIVU

2024 CORPORATE OVERVIEW

KIVU CYBERSECURITY SERVICES

FIGHTING CYBERCRIME SINCE 2009

At Kivu, we don't just understand threats; we specialize in identifying, containing, and mitigating cyber threats. With deep knowledge of threat actors, their evolving tactics, and the dynamic threat landscape, we are uniquely qualified to strengthen your defenses against sophisticated cyberattacks.

We offer a distinctive blend of threat intelligence, industry best practices, and cutting-edge technology to fortify your defenses against the ever-evolving cybersecurity landscape. Boasting a legacy of over 14 years, Kivu has established itself as a global leader in incident response. Leveraging intel from over 5,000 cases, our skilled talent pool brings a wealth of expertise to the table, ensuring organizations thrive against adversity.

Continuously monitor devices & detect and **block new cyber threats**.

WHAT WE OFFER

RESPONSE SERVICES

Kivu rapidly contains cyberattacks, helps recover impacted systems, and restores business operations. If a ransom payment is needed, our experienced negotiators work to lower ransom demands and facilitate payments in compliance with applicable sanctions.

- Investigations
- Digital forensics
- Intrusion scope identification & remediation
- Attack containment

- Ransom negotiations & payments
- System recovery and data restoration
- Expert witness services

MANAGED SERVICES

Cyber threat actors constantly probe organizations for holes in their cybersecurity. Kivu provides its clients with the visibility of threats necessary to defend your organization. Our 24/7 threat monitoring team will continuously detect threats and vulnerabilities. Kivu is the cybersecurity easy button for organizations to reduce cyber risk, increase insurability, and demonstrate reasonable and defensible cybersecurity.

- Active threat hunting & remediation
- 24x7 monitoring and protection of devices, identities, cloud, e-mail, and more.
- Continuous vulnerability identification

- Continuous dark web detection of leaked/stolen data and credentials
- Zero day notifications
- Attack surface identification

ADVISORY SERVICES

As the cyber threat landscape continues to evolve, so does the need for improving resiliency. Kivu's Advisory Services team provides strategic guidance and implementation support to ensure our clients improve and mature their security capabilities to keep pace with today's risks. Our approach leverages deep threat insights captured from Kivu's incident response work to create real outcomes in security for our clients.

- Risk Assessments
- Offensive Security
- Technical Assessments
- Incident Response Preparedness
- vCISO
- Expert Witness on Reasonable Security
