Post Breach Remediation

Kivu's Post-Breach Remediation (PBR) service was designed in response to the urgent need to counter business interruption caused by ransomware. Our technical experts can deploy on-site within 24 hours, offering decryption, recovery and rebuild services to organizations in need.

PBR also seamlessly complements Incident Response (IR) operations, regardless of the provider. Together with our in-house incident response and digital forensic services, PBR allows us to provide end-to-end cyber incident response solutions.

Why Post Breach Remediation?

PBR can significantly minimize losses resulting from business interruption caused by ransomware and other cyber-attacks. Kivu's PBR teams in North America and Europe provide unique expertise and resources to organizations in crisis.

Regardless of whether Kivu responders lead the remediation effort or work as part of a larger team, our dedicated PBR service will provide critical assistance to in-house IT departments, working side by side in the following crucial areas:

- Recovery or restoration of business-critical operations
- Rebuilding and reimaging data from backups or from the ground up
- Identification of initial infiltration, as well as potential lateral movement and data exfiltration
- Interruption of malware spread and ransomware encryption in an ongoing attack

- Preservation of forensic evidence through coordination with remote analysis teams
- Crisis management, including triage and task ownership allocation among large teams of mixed internal and third-party resources
- Assistance on network defense security implementations across the network

- Detection and eradication of ongoing network compromises for improved security post-event
- Provision of real-time information to client IT, C-Suite and counsel, allowing them to respond accurately and without delay to partners, regulators and customers

Remediating Ransomware Attacks
Ransomware causes havoc throughout an organization's network, and each variant leaves its own unique trail of destruction behind. Kivu's PBR team is uniquely experienced in responding to this damage. We combine sound knowledge of IT systems and applications with insight gathered from over 600 ransomware cases to provide a service that aims to keep business interruption to a minimum.

KIVU

Why Kivu?

From incident response to post-breach remediation and data protection, Kivu is dedicated to offering best-in-class cyber security services to organizations worldwide.

We are proud to offer:

FAST RESPONSE

Practical logistics and quick action mean we schedule scoping calls within the first hour and can deploy on-site within 24 hours

TAILORED SERVICE

Kivu has one of the largest dedicated in-house PBR teams in the industry, with responders in North America and Europe

EXPERIENCED RESPONDERS

Highly experienced and certified analysts and project managers, with backgrounds in the military, police, tech multinationals and government bodies

RANSOMWARE EXPERTISE

Proven, industry-leading ransomware response with strict adherence to ransom payment regulations

DEDICATED INSURANCE PARTNER

Kivu is a long-time partner to the insurance industry and found on most cyber panels. We work closely with claims adjusters and breach coaches, which gives us a deep understanding of insurance pain points

About Kivu

Kivu is a leading global cyber security firm that offers a full suite of pre- and post-breach services, specializing in the forensic response to cyber-attacks and ransomware incidents. We deliver cutting edge cyber security solutions to organizations in need and are a trusted cyber incident partner to insurance carriers and law firms worldwide.
